

APPENDIX C

Appendix C

Labeling. (a) The following quantities of licensed or registered material shall require labeling. The quantities listed below were derived by taking 1/10th of the most restrictive ALI listed in table I, columns 1 and 2, of appendix B, rounding to the nearest factor of 10, and constraining the values listed between 37 Bq and 37 MBq (0.001 and 1,000 μCi). Values of 3.7 MBq (100 μCi) have been assigned for radionuclides having a radioactive half-life in excess of E+9 years, except rhenium, 37 MBq (1,000 μCi), to take into account their low specific activity.

Radionuclide	Quantity (μCi)*	Radionuclide	Quantity (μCi)*
Hydrogen-3	1,000	Chlorine-38	1,000
Beryllium-7	1,000	Chlorine-39	1,000

* To convert μCi to kBq, multiply the μCi value by 37.

APPENDIX C

Appendix C

Labeling. (a) The following quantities of licensed or registered material shall require labeling. The quantities listed below were derived by taking 1/10th of the most restrictive ALI listed in table I, columns 1 and 2, of appendix B, rounding to the nearest factor of 10, and constraining the values listed between 37 Bq and 37 MBq (0.001 and 1,000 μCi). Values of 3.7 MBq (100 μCi) have been assigned for radionuclides having a radioactive half-life in excess of E+9 years, except rhenium, 37 MBq (1,000 μCi), to take into account their low specific activity.

Radionuclide	Quantity (μCi)*	Radionuclide	Quantity (μCi)*
Hydrogen-3	1,000	Chlorine-38	1,000
Beryllium-7	1,000	Chlorine-39	1,000
Beryllium-10	1	Argon-39	1,000

(b) For purposes of K.A.R. 28-35-219a(f) and K.A.R. 28-35-228a where there is involved a combination of radionuclides in known amounts, the limit for the combination shall be derived by determining for each radionuclide in the combination, the ratio between the quantity present in the combination and the limit otherwise established for the specific radionuclide when not in combination. The sum of such ratios for all radionuclides in the combination may not exceed "1" -- that is, unity.
